HELIX SAFETYESSENTIALS

EVERY BRAKE CALLS FOR ATTENTION

BRAKE-ACTIVATED AUXILIARY STOP & STROBE

SURFACE MOUNT DIRECTIONAL LED

HDR112AR-P

Make every stop impossible to miss with our brake activated auxiliary stop and strobe directional LED. It triggers the moment you hit the brakes, and a bright strobe pattern alerts drivers behind you that you are slowing down.

The sleek, robust housing keeps mounting holes clear of the lens, so there are no cracks, no leaks, and no compromises. It's a clean, durable upgrade that improves visibility and gives drivers added confidence on the road.
